THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL).

ESTABLISHED 1902.

INDEX TO VOLUME XLV.

July to December, 1931.

Head Office:
49, Wellington Street, London, W.C.2.

XUM

Index to Volume XLV.

SUBJECT INDEX.

A

Age-Hardening of Austenitic Steels, 110.
Air-Hardening Cast Irons, Further Experiments on Oil-Hardening and, 345.
Alloy Cast Irons, 353, 365.
Alloy Irons, High-Test and, 102.
Alloyed Cast Iron, 405.
Alloying Element, Silicon as an, 27.
Alloys for Use at High Temperatures, 43, 120.
Aluminium-Alloy Castings, Moulding Practice for Heat-Treated, 241.
Aluminium Alloys, High-Strength Sand-Casting, 331, 349.
Aluminium Sand Castings, Unsoundness in, 193, 209, 225.
Art Castings, Some Czech, 285.
Austenitic Cast Irons, 237.
Austenitic Steels, Age-Hardening of, 110.
Automobile Cast Iron, Some Recent Developments in, 375.
Automobile Industry, Nickel Cast Iron in the, 267.

B

Bismuth on Cast Iron, Influence of, 149.
Blast Furnace and the Foundry, 302.
Blast Furnace Reactions, 362.
Blast Furnaces, Consumption of American, 152.
Blowholes, Influence of the Temperature of Ingot Moulds on Position of, 74.
Book of Artisan, 314.
Brackelsberg Rotary Furnace, Manufacture of High-Grade Castings in the, 379.
British Cast Iron Research Association, 18, 34, 50, 66, 80, 96, 112, 128, 142, 172, 202.
British Cast Iron Research Association, Annual Report, 299.
British Foundry Industry, Some Notes on the Structure of the, 13.
British Ironfounders' Association, 186, 231.
British Ironfounders' Association Seeks Increased Membership, 354.

C

Canadian National Railway Company, New Montreal Foundry of, 99.
Carron, Famous Men of, 104.
Case-Hardening in an Electric Furnace, New Method of, 38.
Cast Iron, Alloyed, 405.
Cast Iron and Foundry Practice in Great Britain, Recent Developments in, 21, 59.
Cast Iron for High Temperatures, Growth-Resisting, 114.
Cast Iron in Relation to Thickness, Strength of, 243
Cast Iron in the Non-Ferrous Industry, Use of, 388.
Cast Iron, Past and Present Demand for, 224.
Cast Iron, Potentialities of, 81.
Cast Iron, Practical Application of New Formulæ for Determining the Quality of, 265.
Cast Iron, Some Recent Developments in Automobile, 375.
Cast-Iron Test-Bars Cast Vertically and Horizontally, Strength Properties of, 148.
Cast Iron, Thermal and Electrical Conductivities of, 5.
Cast Irons, Alloy, 353, 365.
Cast Irons and their Service to Foundrymen, Low Total-Carbon, 272, 303.
Cast Irons, Austenitic, 237.
Cast Materials for High-Temperature, High-Pressure Service, Some Considerations and Tests for, 7, 254.
Castings for High-Temperature Service, 19.
Castings, Merchandising of, 35.
Castings on a Semi-Repetition Basis, Production of Iron, 276.
Centrifugal-Casting Machine, New, 51.
Centrifugal Casting Process, Speed of Rotation in the, 145.
Chilling Properties of Cast Iron, Factors influencing the, 115.
Coal-Dust Facing Sands, Effect of Heat on Permeability of, 297.
Coke Coated with Lime and the Production of Low-Carbon Iron in the Cupola, Reactivity of, 151.
Coleman Mechanical Loader, 336.
Combustion Gases, Dust in, 129.
Commercial Delivery Van, New Crofts', 108.
Conductivities of Cast Iron, Thermal and Electrical, 5.
Cooling and Solidification of Liquid Metal, 271.
Cooling Spirals, Internal, 151.
Copper Buyers, Problems for, 213.
Copper Crisis, 336.
Copper Crisis Continues, 385.
Copper, Outlook for, 123.
Copper Producers in Council, 250.
Core-Making Machine, Revolver, 45.
Coreprints, 313.
Core-Sand Mixtures, Effect of Heat on Permeability of, 297.
Core Simplified, Difficult, 242.
Correspondence:—
B.C.I.R.A. Activities, 108, 126.
Carbon Pick-Up in the Cupola, 328, 358.
Cast-iron Columns *versus* Steel Stanchions, 2.
Cupola-Melted Copper, 142.
Customs of the Trade, 392.
Economics Again, 158, 172, 192, 220.
Electric *versus* Cupola Iron, 344.
Growth-Resisting Irons, 158.
Learning from Competitors, 312.
Machining Allowances for Brass Castings, 158, 202.
New Preston Section, 386.
Oxygen in Cast Iron, 32.
Pig Cup, 202.
Strength of Cast Iron in Relation to Thickness, 264, 282.
Structure of the British Foundry Industry, 39, 70.
Corrosion of Light Alloys, 324.
Corrosion Problems, Thin Films in Relation to, 173, 197.
Crane Equipment in Foundries, 152.
Cupola Furnace, 316.
Cupola Melting for Non-Ferrous Alloys, 90.
Cupola, Moore Hot-Blast, 165.
Cupola Practice, Discussion on, 413.
Cylinder, Making a Carding-Engine, 28.

D

Defects in Heavy Castings by the Gamma Ray, Detecting, 398.
"Dinta" System, 167.
Dust in Combustion Gases, 129.

E

Efficiency in the Foundry, 255.
Electric-Arc Furnaces for the Production of Iron and Steel, Twenty Years' Advance in, 203, 229.
Electrical Conductivities of Cast Iron, Thermal and, 5.
Electrical Equipment in Foundries, Testing, 369.
Ellipsoid Furnace, 315.
Engineering and Foundry Trades, Relationship between the, 25.

F

Falkirk Foundry Industry, 361.
Faraday's "Steels and Alloys," Notes on a Research on, 258.
Fisher Malleable & Bronze Foundries, Limited, Birmingham, Foundries of, 11.
Flotation of Graphite in Cast Iron, 198.
Founding Throughout the Ages, 244.
Foundry Industry, Correlating the, 67.
Foundry Industry, Some Notes on the Structure of the British, 13.
Foundry of the Staveley Coal & Iron Company, Limited, Sand-Spun Pipe, 71, 83.
Foundry Practice in Great Britain, Recent Developments in Cast Iron and, 21, 59.
Foundry Selling Practice, 4, 82, 129, 214, 291, 323, 348, 374.
Foundry Trades, Relationship between the Engineering and, 25
Furnace, Ellipsoid, 315.
Furnace Patents, Rotary, 398.

G

Gamma Ray, Detecting Defects in Heavy Castings by, 398.
Gases, Dust in Combustion, 129.
General Electric Company, New Ironclad Switchgear Shop of the, 52.
German Foundry Employers' Federation, Sixty-First Annual Meeting, 180.
German Foundrymen's Technical Association, General Meeting of, 3.
Graphite in Cast Iron, Flotation of, 198.
Growth of Cast Iron under Tensile Stress, 306.
Growth-Resisting Cast Iron for High Temperatures, 114.

H

Hardness Induced by Nitriding, 259.
Harper & Company, Limited, Willenhall, Recent Extensions of the Foundry of John, 163.
Heat-Resisting Alloys, 412.
Herbert, Limited, Foundries of Alfred, 41.
High-Duty Iron "G," British Chemical Standard, 60.
High-Strength Sand-Casting Aluminium Alloys, 331, 349.
High-Temperature, High-Pressure Service, Some Considerations and Tests for Cast Materials for, 7, 254.
High-Test and Alloy Irons, 102.
Holland, Pig-Iron Production in, 236.

I

Induction Furnace, Refractory Materials for the, 105, 113.
Industrial Policy as Affecting the Iron and Steel Industry, 283.
Ingot Moulds on Position of Blowholes, Influence of Temperature of, 74.

XUM

670.5 v.45

Institute of British Foundrymen:—.
Branch-Presidents, 234, 250.
Election of New Members, 14, 259.
Falkirk Section, Presidential Address, 361.
Falkirk Section, Visit to Castlecary Works of J. G. Stein & Company, Limited, 13.
First Annual Report, 14.
Lancashire Branch, Annual Picnic, 76.
Lincolnshire Section Inaugurated, 234.
Lincolnshire Section, Presidential Address, 320.
London Branch, Annual Dinner, 391.
London Branch Visit to Staveley Sand-Spun Pipe Foundry, 342.
Middlesbrough Branch, Presidential Address, 258.
Newcastle Branch, Presidential Address, 240.
Newcastle Branch, Visit to Norwood Coke Works, Dunston-on-Tyne, 304.
Scottish Branch, Annual Dinner, 410.
Scottish Branch, Presidential Address, 255.
Sheffield Branch, Presidential Address, 244.
West Riding of Yorkshire Branch, Presidential Address, 276.
"Inverse Chilling of Cast Iron," Phenomenon Incorrectly termed, 319.
Iron-Carbon-Vanadium System, 64.
Iron Salts Cause "Hard Zinc," 342.
Iron-Sulphur-Carbon, Ternary System, 74.
Ironfoundries, National Position of Metallurgical Knowledge and Efficiency in Ordinary, 366.
Ironfoundry without Pig-Iron, Operating an, 305.
Irons, High-Test and Alloy, 102.
Italian Pan-European Foundry Congress and Exhibition, 188, 221, 235, 411.

J

Jar Rollover Machine, New, 399.
Jobbing Foundry Work, 381.

L

Lead-Base Metal *versus* High-Silicon Iron, 223.
Leaders:—
American and German Research, 141.
Attached and Detached Foundries, 233.
B.I.A., 343.
Britain United Unlimited, 281.
British Cast Iron Research Association, 1.
Cast-Iron Roads, 201.
Chemical Plant, 49.
Chilled Rolls, 403.
Cupola Working, 65.
Custom of the Trade, 327.
Developments in Cast Iron, 357.
"Dinta" System, 157.
Economics Again, 127.
Education for the Engineering Industry, 17, 33.
F.C.I.R.A., 95.
Financial Situation and the Foundry Industry, 219.
Foundry Pig-iron Output, 373.
Hyphenated Foundrymen, 403.
Importance of the Light-Castings Industry, 187.
It Would not be Done! 95.
Italian Foundry Congress, 79.
Lesson of the Shipping Exhibition, 171.
Little Things That Matter, 127.
Look to Your Stocks, 201.
Marketing Light Castings, 17.
Mechanisation and Employment, 49.
Medium-Sized Ironfoundry, 281.
Merchandising Castings Overseas, 33.
Metallurgical Changes, 387.
More Custom of the Trade, 357.
New Business, 111.
New Foundry Education Scheme, 157, 171.
Physical Constants, 1.
Plea for Co-operation, 295.
Profit and Loss, 141.
Prophecy and its Fulfilment, 311.
Pulverised Fuel, 327.
Purchase Wisely, 249.
Purchasing Alliance, 311.
Recent Conferences, 249.
Remarkable Development, 111.
Scrap-Purchase and Police Interference, 387.
Seven Years' Progress, 295.
Tendency to be Avoided, 233.
Test-Bar Again, 263.
Testing Cast Iron, 65.
Total Carbon, 79.
Vindication of Castings, 95.
Welding and Workmanship, 343.
Well Begun is Half Done, 187.
What the Ironfoundries *Can* Do, 373.
"Where There's Muck, There's *No* Money," 263.
"Life" of Metals, Mould Dressings and, 60.
Light Alloys, Corrosion of, 324.
Light Castings, Importation of, 30.
Light-Castings Industry, Rehabilitating the, 52.
Lighting of Foundries, 298.
Lime, Reactivity of Coke Coated with, 151.
Liquid Metal, Cooling and Solidification of, 271.
Lloyd & Company, Limited, Steel Foundry of F. H., 393.
Low Total-Carbon Cast Irons and Their Service to Foundrymen, 272, 303.

M

Malleable-Iron Castings, Manufacture and Properties, 143, 160.
Malleable Iron on Various-Sized Test-Bars, Mechanical Properties of, 175, 205.
Mechanical Properties of Malleable Iron on Various-Sized Test-Bars, 175, 205.
Melting, Cheap, 58.
Melting for Non-Ferrous Alloys, Cupola, 90.
Merchandising of Castings, 35.
Metallurgical Knowledge and Efficiency in Ordinary Ironfoundries, National Position of, 366.
Metallurgist in the Foundry, 253.
"Migra Iron," a New Special Pig-iron for High-Quality Castings, 251.
Molybdenum and Titanium upon Grey Cast Iron, Effect of, 39.
Montreal Foundry of the Canadian National Railway Company, New, 99.
Moore Hot-Blast Cupola, 165.
Mould Dressings and "Life" of Metals, 60.
Moulding a Blowing-Engine Piston in Loam, 359.
Moulding a Rope Pulley, 70.
Moulding a Water-Seal Gas-Valve Pan, 352.

N

National Physical Laboratory, Annual Inspection, 73.
New International Association for Testing Materials, Zürich Congress, 204.
Nickel Cast Iron in the Automobile Industry, 267.
Nitriding, Hardness Induced by, 259.
Nitriding Practice, Modern, 107.
Non-Ferrous Alloys, Cupola Melting for, 90.
Non-Ferrous Industry, Use of Cast Iron in the, 388.
Norton Grinding Wheel Company, Limited, New Works, 354.

O

Oil-Hardening and Air-Hardening Cast Irons, Further Experiments on, 345.

P

Parliament, Foundry Representatives in the New, 282.
Patterns, Plaster, 286.
Patternshop, Plywood in the 119.
Permeability of Coal-Dust Facing Sands and Core-Sand Mixtures, Effect of Heat on, 297.
Pig-Iron for High-Quality Castings, "Migra" Iron, A New Special, 251.
Pig-Iron in First Half of 1931, World Output of, 228.
Pig-Irons, Comparative Study of Some Properties of, 337.
Pipe Foundry of the Staveley Coal & Iron Company, Limited, Sand-Spun, 71, 83.
Pipes, Potentialities of South American Markets for Cast-Iron, 118.
Pistons for Internal-Combustion Engines, Casting of, 409.
Plaster Patterns, 286.
Plywood in the Patternshop, 119.
Production of Iron Castings on a Semi-Repetition Basis, 276.
Public Works, Roads and Transport Exhibition, 326.
Pulverised Fuel to the Foundry Industry, Application of, 287, 321.

R

Reactivity of Coke Coated with Lime and the Production of Low-Carbon Iron in the Cupola, 151.
Refractory Materials for the Induction Furnace, 105, 113.
Research, Application of Industrial, 189.
Research in the Iron and Steel Industry, Co-operative, 130.
Rollover Machine, New Jar, 399.
Rotary Furnace Patents, 398.
Rotary Furnace Product, Pulverised-Fuel-Fired, 408.

S

Saddle Castings, Making Large Steel, 329.
Sale of Goods, Some Notes on the Law Affecting the, 98.
Sand-Blast Plant, Modern Applications of, 382.
Sand-Casting Aluminium Alloys, High-Strength, 331, 349.
Sand Plants, Automatic, 133.
Sand-Spun Pipe Foundry of the Staveley Coal & Iron Company, Limited, 71, 83.
Sands and Sand-Testing, 53, 86, 97.
Sands for the Steel Foundry, Comparison of Natural-Bonded and Synthetic Moulding, 159.
Scrap Dealer's Opportunity, 306.
Scrap-Metal Position, 92.
Selling Practice, Foundry, 4, 82, 129, 214, 291, 323, 348, 374.
Sifter, New Portable Suspended Electric Vibro, 414.
Silicon as an Alloying Element, 27.
Solidification of Liquid Metal, Cooling and, 271.
South American Markets for Cast-Iron Pipes, Potentialities of, 118.
Spelter Outlook, Brighter, 320.
Spelter Starts to Climb, 52.
Staveley Coal & Iron Company, Limited, Sand-Spun Pipe Foundry of the, 71, 83.
Staveley Sand-Spun Pipe Works, Official Opening, 228.
Steel Castings, Vanadium in, 364.
Steel in First Half of 1931, World Output of, 228.
Steel Saddle Castings, Making Large, 329.
Steel, Welding Qualities of, 397.
Steels, Age-Hardening of Austenitic, 110.
Steelwork Association, New, 301.
Sulphur in Foundry and Hematite Irons, Determining, 318.
Synchronous Motor Drives in the Foundry, 330.
Synthetic Moulding Sands for the Steel Foundry, Comparison of Natural-Bonded and, 159.

T

Technical Co-operation, 108.
Tensometer, New Type of Testing Machine, 75.
Ternary System Iron-Sulphur-Carbon, 74.
Test-Bars Cast Vertically and Horizontally, Strength Properties of Cast-Iron, 148.
Testing Machine, New Type of, 75.
Tests for Cast Materials for High-Temperature, High-Pressure Service, Some Considerations and, 7.
Thermal and Electrical Conductivities of Cast Iron, 5.
Tin Prospects, 166.
Titanium upon Grey Cast Iron, Effect of Molybdenum, 39.
Total-Carbon Cast Irons, Low, 272, 303.
Transverse Strengths, Graphic Calculation of, 306.
Tungsten in China, 262.
Turbo-Alternators of 50,000 kw., 363.

U

Unsoundness in Aluminium Sand Castings, 193, 209, 225.

V

Vanadium in Steel Castings, 364.

W

Welding Qualities of Steel, 397.

DETROIT MICH.
